Always deliver more than expected

WHAT KIND OF STAIRCASE DO YOU HAVE?

Because every staircase is different, Brooks Stairlifts have been developed to be highly adaptable. Whatever type of staircase you have in your home - straight or curved - a Brooks lift can provide the perfect solution for your needs.

The Straight Stairlift

The simplest solution for a straight staircase, the Straight Stairlift uses a single rail attached to your staircase. Its unique slimline design ensures that there is plenty of space left for other members of the family to use the stairs.

Dimensions		mm	inch	Specifications
A	Floor to top of footrest	85	3½	Motor Output Speed No greater than 0.15 m/s
B	Top of footrest to top of seat	455	18	
C	Top of seat to top of arms	250	10	
D	Top of arms to top of seat back	250	10	Method of Drive Rack and Pinion
E	Width between armrests (wide arm version)	445 (495)	17½ (19½)	
F	Overall width	620	24½	Power Supply 24V DC (battery)
G	Overall height	975	38½	
H	Length of arms from seat back	470	18½	Maximum Capacity 127kgs
I	Length of seat base from seat back	425	16¾	
J	Length of footrest	325	12¾	Track Extruded Aluminium
K	Width of footrest	310	12¼	
L	Front of footrest to stringer	546	21½	Mains Supply 230 - 240V AC 50Hz
M	Back of seat to stringer	13	½	
N	Folded depth	280	11	

The Curve Stairlift

If your staircase has turns, intermediate landings or limited space at the top or bottom, it may be necessary for a curved stairlift to be fitted. Using a unique modular system, accurate measurements enable us to tailor-make a stairlift rail which closely follows the contour of your staircase, in days – not weeks.

Dimensions		mm	inch	Specifications
A	Floor to top of footrest	50	2	Motor Output Speed No greater than 0.15 m/s
B	Top of footrest to top of seat	485	19¼	
C	Top of seat to top of arms	250	10	
D	Top of arms to top of seat back	200	8	Method of Drive Rack and Pinion
E	Width between armrests	480	19	
F	Overall width including seatbelt	620	24½	Power Supply 24V DC (battery)
G	Overall height	980	38½	
H	Length of arms from seat back	470	18½	Maximum Capacity 90kgs
I	Length of seat base from seat back	425	16¾	
J	Length of footrest	360	14	Track Extruded Aluminium
K	Width of footrest	375	14¾	
L	Front of footrest to stringer	640	25¼	Mains Supply 110 - 230V AC 47 - 63Hz
M	Back of seat to stringer	55	2	
N	Folded depth	335	13	

A safety belt is fitted to all Stairlifts so you feel secure at all times.

Directional paddle switches give you complete control. They can be operated easily should you have limited dexterity

A simple digital display allows you to see the exact status of the stairlift at all times.

A lockable on/off switch provides additional "child friendly" safety.

Safety sensors on the footrest and carriage stop the lift automatically and very gently should there be any obstruction on your staircase.

A lockable swivel seat means you can get on and off your stairlift without twisting your body. Once turned it also provides a stable base and safety barrier at the top of your stairs.

Two remote controls are provided so that you have the convenience of being able to call or send the lift up or down the staircase.

Slim fold away design has folding arms, seat and footrest so other people in your home can continue to use the staircase as normal.

Features, Benefits and Options

If you have problems with your knees, or would prefer to stand rather than sit, there are alternative Brooks Stairlifts that may be more suited to your needs.

Outdoor Lift*

Fully weather-proofed, ideal for outdoor use. With all of the same features and options as the Straight. Supplied with a durable waterproof cover for extra protection.

Hinged Rail

In situations where there may be an obstruction at the foot of the staircase (usually a door), or where the stairlift could cause a tripping hazard, a hinged rail is required to 'fold back' away from the obstruction when the stairlift is not in use.

Sit / Stand*

Designed for multiple users with different requirements, the Sit/Stand Stairlift allows the user to either sit or stand depending on the user's choice.

Perch*

Designed for users who have trouble bending at the knee, the Perch Stairlift still allows the user to travel in safety and comfort. The perch is also perfect for narrow staircases.

* Only available on the Brooks Straight

Stay in your home and continue to enjoy your independence

Stairlifts are designed with simple and effortless operation, ease of use and comfort in mind. The unique rail system means a Stairlift can be fitted to all types of staircase, and what's more, it can be done within a matter of days rather than weeks.
